I love the way you can draw anything you wish, to solve the puzzles. I usually try to come up with the most complex machine I can think of. I Love it!. It's a short game, but I enjoyed it. (I was a little surprised that one of the girls didn't get a route though.) The game does end rather suddenly right when you're expecting more explanation. I was left confused by several things, including if the title has any significance, and of the true identity of all of the characters.

If you don't mind a little confusion and some unanswered questions, its an enjoyable ride.. There wasn't enough visual silliness in this instalment, so.... I didn't really enjoy the game I doesn't really tell you what to do and the graphics are just bad. 4/10. Picked this game up yesterday and its been all I can think about since... Minimalistic feel and price. Would love to see more variety of characters, enemies, & weapons in time but for now I'm still lovin the game. My only complaint is that the graphics make me a little dizzy if I go too fast lol. Maybe have more screen size options something in-between fullscreen and little tiny windowed box. Other than that solid rouge-like that doesn't feel like any other game I've played :)

. Levels feels unfinished but still it's pretty fun.. Arma 3 is an amazing military sandbox game. I would recommend this to everyone who is into military simulation. Scenario creation is my favourite part of the game!. 10/10 The ears and tails attachments, although japon styles costumes are very good looking.

it is hell to play just like a relationship.....maybe i shouldn't post this as no one will take this joke seriously but it is fun and it has one of the best skins in the game so buy it for yourself and your loved one because nothing says love like killing goblins and orcs. Good old "Army Men", but with graphics and high quality sound. This is not a review of the software's quality and capabilities so much as a response to the other reviews which report problems with the software communicating with the licensing server. In 100+ hours of use over one week, I have experienced 1 single problem/disconnect during which time the CapturingReality website was offline and/or unreachable for ~15 minutes (my internet was working but the CapturingReality website was returning a 503 error page). This server-side problem disrupted the software on my client-side, interrupting a 90 minute process at the 60 minute mark, compelling me to start the process again (and therefore costing me 60 minutes). However, all in all, the software has been able to communicate with the licensing server for over 99% of the time, and I would happily recommend it to others on that count.. If you love MotoGP buy it. I have some bike that I want to put into this game "#15 Sete NSR500V or Okada NSR 500 V Proarm". The absolute best brick breaker game ever made, hands down. Get this game! Rockin' soundtrack too.. Love it, really handy for playing games on your tv.. Six Sides of the World is an exciting puzzle game that might draw you in with its story. The music fits perfectly with each level and theme of the game and is quite challenging, if you're up for it. There are new mechanics and obstacles awaiting for you as you continue further through the game. As you go through the game, you will discover more of the story of the ultimate space journey that you must go on. The graphics are stunning and the background of each level are gorgeous. The game might be kind of expensive, but I believe I got my money's worth with this awesome game!. Overall review:

The game is hilariously fun. All the levels play out very differently and remain unique. The music is very up-beat which really suits the game and forms an energetic motivation to keep playing. The animations are very wacky which creates some laughable moments.

Nevertheless this game is very rough around the edges and the controls create a very high skill ceiling because they are hard to get a grip at. (I'd reckon the developers did this on purpose to get the most challenging out of their game :) )

This game has 40 levels and I hope the devs are making more. They announced they will. The overall playtime to finish this game a first time is about 1h and 20m.

Personal experiences and recommendations:

I bought this game for me and as a gift for my friend. This really made the game what it is for me right now. I think I couldn't last to the end if I were playing completely by myself. Now of course this game is a singleplayer game but with the big offer of communication services these days (skype, teamspeak, discord), it is really easy to just boot up the game together at the same time and just play along.

As for how I experienced it the way I discovered it with my friend it purchase worth well beyond 79 cents.

Tips:

The most important thing to know when starting to play this game is to \*not press 'W' when landing from a jump\*. That will get Fred to trip over instantly losing you a lot of time.

Because that brings me to the next tip: since this game has no tutorial of key-walkthrough; it is good to know that 'F' can get Fred to instantly fall over or stand up when lying on the ground.

The current WR for finishing the whole game is at 32:48,52 put down by GlennField

And my PR is not far from it with 33:55,67

RL;DR

I recommend this game if you play it together with a friend at the same time. (Can we couch co-op or just playing the game at the same time at different computer)

I had a lot of fun whilst playing it!

I highly recommend anyone to play it and maybe join our little (speedrunning)community!. When I first saw this game, I avoided picking it up because of a certain highly-rated review that described it as overly difficult and unfinished. Most of us rogue-lite fans have played amateurish games before and been disappointed, so it was easy to write this one off as yet another project where the developer released an abortive attempt once they'd become fed up with working on it. I let the game linger on my wishlist for at least a year, and probably several, before finally deciding to take the chance.

And I couldn't be happier that I got it. It isn't one of the best games of all time, but it's very fun and unique, and the fun v price ratio is extremely high. Far from being impossible, it's actually fairly easy to beat, especially with certain characters and runes. My first victory was after maybe around an hour of playing, and I'm not an expert gamer. But you can't rush into things

haphazardly, and you also have to learn to adapt to a system that is unconventional in many different ways.

At its heart, the gameplay and skill types are quite similar to old NES-era games. This is a game about memorizing enemy attack patterns, developing appropriate responses, learning the game's system (player attacks, items), and repeated precision control. Many action roguelites have arenas or boss rushes so that players can practice without having to work their way through a run, but in VoTS, you can practice in an arena against regular enemies. And it's a good idea to do so, since everything is deadly here.

But although everything is deadly, there is also always a strategy, and often it requires thinking outside the box, or taking approaches that you wouldn't normally use. For most bosses, you want to be decked out with the right items before you go after them, so the order that you proceed in a run depends on what you find along the way. Because of the soul system, you do tend to spend less time exploring, unlike most similar games.

What makes this game so fun is learning how to handle challenges that at first seem overwhelming. You start out learning to do basic things like time your attacks and dash-retreat, but this quickly becomes insufficient, and if you expect to be able to get far in a run with such basic techniques, then you'll fail repeatedly and get frustrated. Instead, you have to learn when to attack and when to ignore enemies, when to spam wand attacks and when to use invisibility to avoid encounters, what bosses to go after based on your items, and what to expect from dungeon layouts. To me, perhaps the highest joy of gaming is being confronted with a new system, and gradually learning how to use it and accomplish your goals. By that standard, VoTS is an excellent game.

This game does come across as low-production. The interface is clunky and sometimes awkward, and it's missing a lot of polish. Most of the time when I kill the final boss, it takes me a minute to determine whether I won or lost, since there's just a small text popup either way. There is no story, no tutorial, and I didn't see any way to tell how many coins runes cost. But the game has an enormous amount of heart, and the core mechanics are elegantly designed. In some ways, VoTS reminds me of some ARCECEN games.

This is a game for players who enjoy learning new systems and won't qq when traditional approaches prove ineffective. I definitely recommend it.. Excellent DLC. The ship plays very similar to the original, uses the same sound effects, new remixed music is pretty good too. I would honestly recommend all of the Capcom DLC to tell you the truth. If the price is not something that you like. Wait for a sale. It will drop again very soon.
